Christian Medical College Vellore

Person-to-Person

PtP you bridge the gap

March 2024

49-year-old Vijay (name changed), a daily wage welder, was diagnosed with Systemic Lupus Erythematosus (SLE) in 2015. For nearly a decade he is a regular patient at the Rheumatology Department. In January, he was admitted with pneumonia. PTP and other subsidies covered his treatment costs. Your gift made this possible. **This report gives more details about the 1,728 patients supported by PTP in the last 12 months.**

Thank you for your thoughtful giving!
