

We invite you to a workshop on interphase fluorescence in situ hybridization (FISH) from February 6 - 8, 2019. This hands-on programme conducted by the Cytogenetics Unit of the Christian Medical College, Vellore, will be useful for anyone who would like to perform interphase FISH analyses.

In this workshop participants will be guided to perform all aspects of interphase FISH*

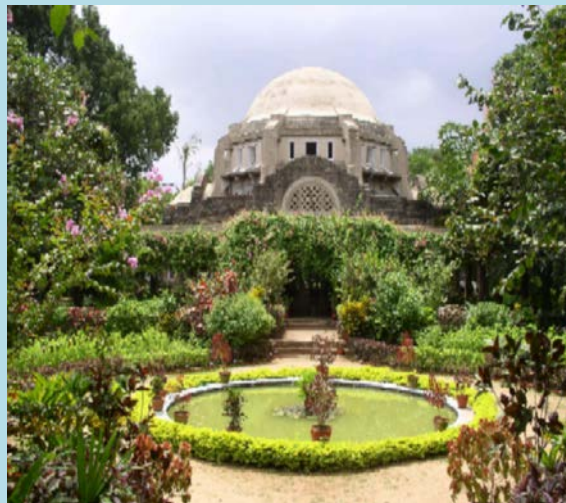

- processing of samples (blood, bone marrow, fluids)
- preparation of reagents
- denaturation
- hybridisation
- washing
- slide reading

** Commercially available probes will be used for the workshop*
