State Level Workshop On “Facility Based New Born Care”

Organized by
**Departments of OBG Nursing and
Continuing Nursing Education &
Research
College of Nursing, CMC, Vellore**

Date : March 7, 2019

Time : 08.00am- 05.00pm

Venue : CNE Lecture Hall,
College of Nursing,
CMC, Vellore

State Level Workshop on 'Facility Based New Born Care'

Facility based Newborn care has become the need of the hour to ensure healthy survival of all neonates for improving child health. To reduce the neonatal mortality rate to under 10/1000 live birth from the prevailing level of 29 in India the focus is shifted on providing newborn nursing on facility based new born care. This is mainly to empower the nurses to provide skilled care to sick and premature neonates. It is the nurses who primarily provide the life saving interventions to the babies, enable the mothers for baby care & counsel the families for Quality care. It is essential to have well trained health care professionals. The workshop aims to strengthen their core competence.

The team of Obstetrics and Gynecology nursing and Continuing Nursing Education & Research, College of Nursing, CMC, Vellore cordially invite you for the workshop on 'Facility Based Newborn Care' which will be held at CON, CMC, Vellore on March 7th 2019 from 7.00 am to 5 pm

The aim of the workshop is to educate the participants on Facility Based Newborn Care and their practice to improve their competency in implementing the care appropriately and effectively.

We request you to kindly sponsor nurses from your institution & give details of the members participating in the workshop on or before February 20th 2019.

Workshop Objective

At the end of workshop the participants will be able to

1. Understand Facility Based Newborn Care.
2. Assess and provide adequate thermal protection for Newborns.
3. Understand and Manage Neonatal seizures.
4. Perform rapid assessment of sick newborn.
5. Transport a sick newborn safely.
6. Identify and manage hypoglycemia.
7. Provide effective immediate Newborn care.
